

Environmental and Industrial Hygiene

Environmental and industrial hygiene issues can result from all sorts of biological, chemical, and physical hazards. They can cause severe or even fatal injury and sickness and sometimes go unnoticed until the effects are actualized.

Experts at Envista Forensics have career-specific experience with and hands-on knowledge of handling health and safety concerns involving the natural and built environment.

Environmental Engineering

Environmental consulting combines different disciplines to provide solutions to complex problems. Envista offers services in environmental engineering, chemistry, geotechnical, and geological sciences, site development, human factors, hydrology, regulatory compliance, decontamination, and remediation.

Industrial Hygiene

Envista's industrial hygiene experts can assist in cases where health and safety or industrial hygiene issues are suspected, or as a part of a multidisciplinary investigation when issues like flooding or fire arise.

Our experts can work with you to take various samples of all affected areas, check for chemical and biological contaminants, and provide a complete remediation plan based on a risk-informed approach.

Our industry-leading experts can help you assess liability and protect public health on construction projects and in manufacturing, commercial, residential, healthcare, and education facilities.

A Unique Approach

We know that every case is unique and will guide you on what can be kept or what is required to be remediated or repaired. Our experts have the understanding and experience to handle health and safety concerns involving:

- » Asbestos and Lead
- » Biological Hazards
- » Chemical and Toxic Contamination Assessments
- » Environmental Compliance
- » Exposure Assessments
- » Geotechnical and Soil Studies
- » Hazardous Materials Management
- » Hydrological Studies and Watershed Modeling
- » Indoor Air Quality
- » Landfill Management
- » Mold and Moisture Damage
- » Outdoor Noise Surveys and Vibration
- » Radiological Waste Handling
- » Renewable Energy Source Evaluations
- » Smoke and Combustion Residue Assessments
- » Stormwater Management
- » Stream, River, Lake, Reservoir Ocean Contamination
- » Water and Wastewater System Evaluations
- » Wetland Protection
